Image: Active Serum

AG Skin Solutions - Active Serum
Product ID: 25300

A&G Active Serum is an anti-aging skin serum formulated with patent-pending technology. Human growth factors include TGF- β (1-3) [Transforming growth factor beta], PDGF [Platelet colony-stimulating factor], and Interleukins (IL3, IL6-8). As we age, the production of these factors decreases, leading to skin aging. By re-introducing these factors through daily application of A&G Active Serum, the skin's natural processes are stimulated, and the appearance of fine lines and wrinkles will be diminished. Visible results will occur within as little as three days. Moderate skin renewal may occur within two weeks, but optimal improvement may take up to six weeks. Patients from an ongoing clinical study had the following results after only four weeks of use: 94% of the women saw improvement in overall appearance of skin. 85% experienced improvement in skin texture/smoothness. 79% felt an increase in skin firmness and elasticity. 87% saw a reduction in the appearance of fine lines and wrinkles.

Retail Price: \$199.00

Usage:

After cleansing, dispense a small quantity onto clean finger and gently apply over the entire face. Optimal improvement to your skin is generally not reached until after 6 weeks of daily use.

This engineering marvel is a special gel/cream hybrid. Unlike traditional eye treatments, the ingredients were blended specifically for the delicate skin around the eyes. This new product delivers lots of moisture and hydration to the delicate skin around the eyes. Turn back the hands of time. Hydrates your skin directly with purified water instead of harsh chemicals. Nourishes your skin with the organic miracles of life known as amino acids. Absolutely essential to the health and beauty of your skin. Defends against the environment and bacteria. The Amino acids are the building blocks of all living tissue on earth. Amino acids are the main moisture retention factors in your skin. They help increase your skin's moisture content while decreasing visible lines. In addition, amino acids help in the production of collagen and elastin, which help reduce sun damage and give the skin a softer smoother feel. In anecdotal reports, topically applied amino acids have helped with rosacea, acne, stretch marks, and other skin care challenges.

Shade: Medium mauve rose
Texture: Velvet
To Each Its Own- The BE Eyecolor Difference. As individual as you are, bareMinerals Eyecolors are different. Texture guide:
• A velvet of eyecolor: the most opaque of the three. Incredibly creamy color texture
• A glimpse of eyecolor: supremely soft and sheer with a touch of glow. Use dry
• A glimmer of eyecolor: high intensity sheen. Can be softer and more translucent (called "foiling").

Benefits:

- 100% pure bareMinerals
- Preservative-free and non-irritating
- Vibrant, stay-true colors from sheer to full finish
- Provide sheer-to-opaque coverage
- All-natural consistency makes them easy to apply and blend seamlessly
- Add rich, eye-illuminating accents
- No pulling or tugging of the eye area
- No creasing
- Lasts all day long

Blush Eyecolor

Shade: Light peach pink

Texture: Velvet

To Each Its Own- The BE Eyecolor Difference. As individual as you are, bareMinerals Eyecolors are formulated to give you the texture you want. Texture guide:

- A velvet of eyecolor: the most opaque of the three. Incredibly creamy color that gives you a soft, velvety finish.
- A glimpse of eyecolor: supremely soft and sheer with a touch of glow. Use dry for full coverage or with a brush for a "foiling" effect.
- A glimmer of eyecolor: high intensity sheen. Can be softer and more translucent with a brush.

Benefits:

- 100% pure bareMinerals
- Preservative-free and non-irritating
- Vibrant, stay-true colors from sheer to full finish
- Provide sheer-to-opaque coverage
- All-natural consistency makes them easy to apply and blend seamlessly
- Add rich, eye-illuminating accents
- No pulling or tugging of the eye area
- No creasing
- Lasts all day long
